# New Horizons, renewed strength...

COMEVAL® is a leading Company in the field of Valves and Products for Flow Control. Established in 1974, its continuous growth set the path to become a major international player in the valve distribution business and also the manufacturing of niche products to complete a rich portfolio of private labels.

This brochure illustrates our company at a glance, our global corporate network, market sectors, products and capabilities which are within reach of our vast range of customers .

Our Company has forged clever business synergies over the past years with manufacturing partners having created unique products of high quality standard, moderate prices of great appeal to the distributor combined with large stock availability and a superb after market service. This is the core of our business, our qualities, and the ones you get with every product of ours.

Since January 2011 our Company was acquired by ARI ARMATUREN® thus reinforcing their international network of subsidiaries and owned companies. ARI ARMATUREN® is a German manufacturer of a wide range of valves for steam, Heat Transfer Fluids and processes with an international coverage and a reputation gained over the years thanks to a strict commitment to quality, product design, performance and flexible deliveries.

This integration favoured the expansion of the COMEVAL® range of private labels to further shores whilst appointing us within the Group as the competence centre for complete valve packages.

A truly global Group with coverage in more than  
65 countries across the 5 continents

The COMEVAL® range of private labels and distribution products are rich enough to cover hundreds of industry sectors encountered in HVAC, WATER WORKS, POWER, PROCESS, MARINE and INDUSTRY.

# POWER HVAC MARINE and INDUSTRY WATER WORKS PROCESS

## Process Plants

(Fertilizers, Phosphates, Mining, Ammonia, Ceramics, Slurries, mineral oils, lubricating and quenching oils..).

## HVAC

(Hospitals, Public Buildings, Shopping Malls, Hotels, Leisure Centres, Sport centres..)

## Water Works

(Irrigation Systems, Waste and Water Treatment, water ducts, Reverse Osmosis..)

## Power

(Renewable energy, fossil energy, oil & gas, Refineries, Combined Cycle plants, thermoelectric, hydroelectric..)

## Marine

(shipyard, marine engines, winches, gear boxes..)

## Industry

(food and beverage, textile, paints, automation, pressure vessels..)

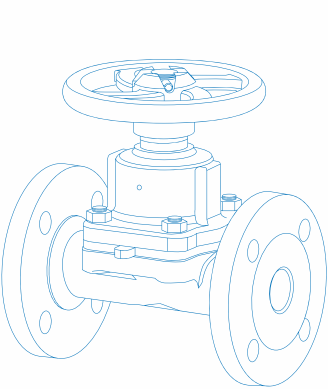

## Brands forged by reliability

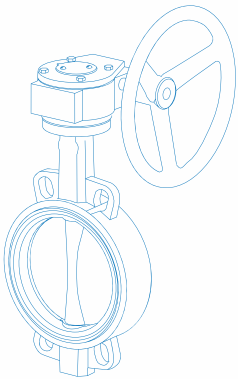

We design and pursue the manufacture of a selected range of products to service the Water Works and Process market sectors. Through Computer Assisted Design techniques the best products turn out into reality, Double pattern inventory makes possible to make equal products at higher productivity rates.

The excellence of design leads to high quality products at appealing price level thus enjoying a growing reputation in international markets, This is the essence of our range of private labels, UNIVAL, DIAVAL, UNICHECK, BV, COMEVAL, PILAN and TORAFLEX, a winning team at today's demanding markets..

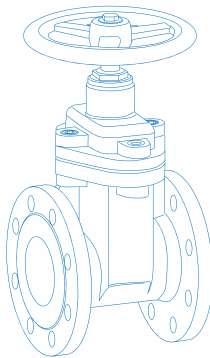

**DIAVAL<sup>®</sup>**

Diaphragm Valves

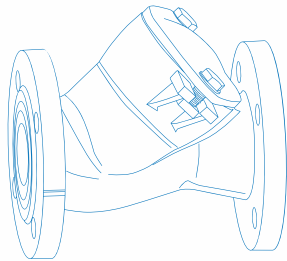

**UNIVAL<sup>®</sup>**

Butterfly Valves

**COMEVAL<sup>®</sup>**

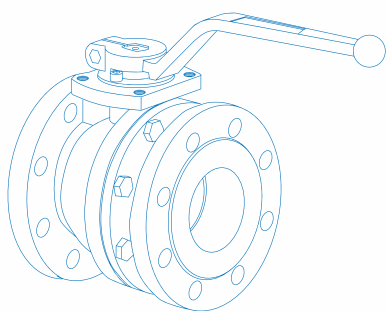

Strainers  
Gate Valves  
API Valves for the Oil & Gas Industry

**UNICHECK<sup>®</sup>**

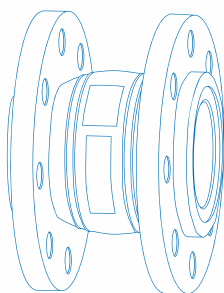

Check Valves

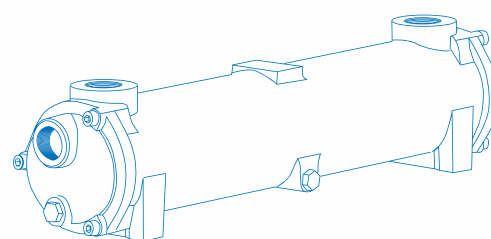

**BV®**

Ball Valves

**TORAFLEX®**

Rubber Expansion Joints

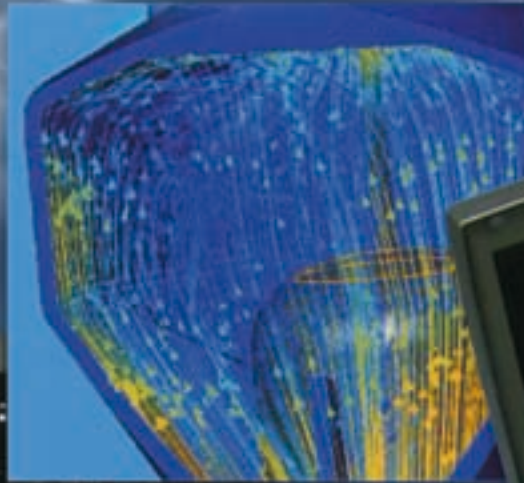

**PILAN®**

Hydraulic Oil Coolers

Testing Facilities

# After Market Training Valve Automation

Offsite Service

# More than Products

- It is not just about products but providing a superb added value on all our business operations thanks to the latest plant equipment and professional staff.

- All our products are backed up by an excellent after market service that can be performed in site and offsite in every part of the world thanks to our networks of agents and supporting Group offices.

- Our service engineers can also perform routinely checking of valves and enhancement planning, revamping and plant start up supervision support.

- Third party inspections at our workshop, special tests, valve assemblies and valve modification are a standard procedure meaning no additional cost to our customer network.

- Moreover, regular training schemes are also facilitated to customers and end users wanting to increase their knowledge on valve selection, sizing, maintenance and fluid engineering.

## Product Catalogues for distributors

We support our distributors with technical catalogues of our private labels, conveniently classified and bound into our comprehensive pack.

Should electronic formats or on-line information is required; our web site is providing a free access to vast information about product features, maintenance instructions, drawings, manuals and so on.

Be part of our satisfied and well informed customers.
